

ARMEN CHEHILY | SYDNEY SECURITY GENERAL MANAGER

B. SCIENCE (MOLECULAR BIOLOGY AND BIOCHEMISTRY), CERT IV TRAINING AND ASSESSMENT

UP CLOSE...

Armen is a big fan of soccer—both watching it and playing it. He's also an eager handyman, and when he's not spending time with family and friends, you'll often find him fixing up things around the house.

Armen is a **results-driven professional** with a **wealth of experience across his career including 12 years in the security industry, 15 years in business development and client relations management, and 15 years in sales and management.**

He started his career as a molecular biologist, and worked in the science industry for many years in managerial roles across hospitals and research institutes. In 2003 he was given the opportunity to work in the security industry, initially part time, before swapping the lab permanently for being out in the field, and he has worked in and around security ever since.

Together with his brother Ben Robert, they founded Sydney Security and Ozland Group Solutions in 2015, and Armen has played an integral role in building the company to what it is today.

Armen holds a Bachelor of Science (Molecular Biology and Biochemistry) and a Certificate IV in Training and Assessment, and he has a dedicated passion for training and upskilling others. Not satisfied with the level of training of the security guards coming through the business, **he launched and ran his own RTO for a number of years, training up-and-coming security professionals in a range of qualifications.** While he has since sold that business, he continues to play an active role in training and mentoring Sydney Security and Ozland Group Solution's guards and operations team members to this day.

“It’s been a joy watching Ozland Group Solutions grow and have accomplished managers joining the business to take it to the next level.”
